

TUESDAY, 14 MAY 2024 – AFTERNOON

GEOGRAPHY – AS UNIT 1
CHANGING LANDSCAPES

2 hours plus your additional time allowance

Surname

First name(s)

Centre Number

Candidate Number

2

ADDITIONAL MATERIALS

Resource Folder.

A calculator.

INSTRUCTIONS TO CANDIDATES

Use black ink, black ball-point pen or your usual method.

You may use a pencil for graphs and diagrams only.

Write your name, centre number and candidate number in the spaces on the previous page.

Write your answers in the spaces provided in this booklet.

In Section A, answer EITHER questions 1 and 2 OR questions 3 and 4.

Answer ALL questions in Section B.

(Turn over)

If further space is required you should use the additional page(s) at the back of this booklet. The question number(s) should be clearly shown.

INFORMATION FOR CANDIDATES

The number of marks is given in brackets [] at the end of each question or part-question; you are advised to divide your time accordingly.

THIS PAPER REQUIRES THAT YOU MAKE AS FULL USE AS POSSIBLE OF APPROPRIATE EXAMPLES AND REFERENCE TO DATA TO SUPPORT YOUR ANSWERS. SKETCH MAPS AND DIAGRAMS SHOULD BE INCLUDED WHERE RELEVANT.

A plain page is available near the back of the booklet for you to add any relevant sketch maps and diagrams you may wish to include. The question number(s) should be clearly shown.

(Turn over)

SECTION A: CHANGING LANDSCAPES

Answer EITHER questions 1 and 2 OR questions 3 and 4 from your chosen landscape.

Make the fullest possible use of examples and data to support your answers.

EITHER: COASTAL LANDSCAPES

Answer questions 1 AND 2 if this is your chosen landscape.

1 (a)(i) Use FIGURE 1a opposite to state the six-figure grid reference of the Salt House (X). [1 mark]

(Turn over)

- 1 (a)(ii) Use FIGURE 1a and FIGURE 1b opposite to give the direction in which the camera was facing when the photograph was taken.

[1 mark]

-
- (iii) Use FIGURE 1a and the RESOURCE FOLDER to describe the characteristics of Port Eynon Beach. [3 marks]

(Turn over)

1 (a)(iv) Suggest ONE way in which the coastal landscape in FIGURES 1a AND 1b could have a positive impact on human activity. [3 marks]

(Turn over)

1 (b) Examine the importance of cliff erosion in the supply of sediment to the coastal system. [8 marks]

(Turn over)

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

(Turn over)

(Turn over)

Additional space for Question 1(b) only:

(Turn over)

**2 (a)(i) Use FIGURE 2a AND FIGURE 2b
opposite to describe changes in the
area shown. [5 marks]**

(Turn over)

2 (a)(ii) Suggest why groynes have been constructed in this area.

[3 marks]

(Turn over)

2 (b) Examine the role of geological factors in determining the rate of coastal erosion. [8 marks]

(Turn over)

(Turn over)

(Turn over)

(Turn over)

OR: GLACIATED LANDSCAPES

Answer questions 3 AND 4 if this is your chosen landscape.

3 (a)(i) Use FIGURE 3a opposite to state the six-figure grid reference of the summit of Pen yr Ole Wen (X).

[1 mark]

(Turn over)

3 (a)(ii) Use FIGURE 3a AND FIGURE 3b opposite to give the direction in which the camera was facing when the photograph was taken.

[1 mark]

(Turn over)

3 (b)(iii) Use FIGURE 3a and the RESOURCE FOLDER to describe the characteristics of the cirque at Cwm Idwal.

[3 marks]

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

(Turn over)

**3 (a)(iv) Suggest ONE way in which the
glaciated landscape in FIGURES 3a
AND 3b could have a positive impact
on human activity. [3 marks]**

(Turn over)

3 (b) Examine the importance of winter precipitation to mass balance in a glacier system. [8 marks]

(Turn over)

[illegible]

(Turn over)

Additional space for Question 3(b) only:

(Turn over)

**4 (a)(i) Use FIGURE 4a AND FIGURE 4b
opposite to describe changes in the
area shown. [5 marks]**

(Turn over)

(Turn over)

4 (a)(ii) Suggest why rapid mass movement may occur in this area. [3 marks]

(Turn over)

4 (b) Examine the role of freeze-thaw weathering in the formation of ONE OR MORE periglacial landforms.

[8 marks]

(Turn over)

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

(Turn over)

This image shows a blank sheet of white paper with horizontal black ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Additional space for Question 4(b) only:

(Turn over)

SECTION B: TECTONIC HAZARDS

Answer ALL questions.

Make the fullest possible use of examples and data to support your answers.

5 (a) Use FIGURE 5a opposite to describe variations in the likelihood of liquefaction. [6 marks]

(Turn over)

[illegible]

(Turn over)

FIGURE 5b opposite: A CHI-SQUARED TEST WAS USED TO SEE WHETHER SURFACE GEOLOGY IN CALIFORNIA SIGNIFICANTLY IMPACTS THE INTENSITY OF GROUND SHAKING.

The NULL HYPOTHESIS is: ‘There is no significant difference in the intensity of ground shaking in areas of differing surface geology during earthquakes in California.’

FIGURE 5c: CRITICAL VALUES FOR CHI-SQUARED TEST

SIGNIFICANCE (CONFIDENCE) LEVELS	95% (0.05)	99% (0.01)	99.9% (0.001)
CRITICAL VALUES	5.99	9.21	13.82

(Turn over)

**5 (b)(i) Give the values for A and B in
FIGURE 5b opposite page 37.**

[2 marks]

A _____

B _____

**(ii) Use FIGURE 5b AND FIGURE 5c on
page 37 to comment on the nature and
significance of the result of the
Chi-squared test. [4 marks]**

(Turn over)

(Turn over)

5 (c) Outline the secondary effects of a named earthquake event. [8 marks]

[illegible]

(Turn over)

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

(Turn over)

Additional space for Question 5(c) only:

(Turn over)

(Turn over)

6 (a) Use FIGURE 6a opposite to describe the path of the 2002 lava flows from Mount Nyiragongo. [2 marks]

(Turn over)

6 (b) Use FIGURE 6b opposite to describe the distribution of areas of HIGH social vulnerability to volcanic eruptions.

[5 marks]

(Turn over)

6 (c) Use FIGURE 6a opposite page 44 AND FIGURE 6c opposite to suggest PHYSICAL reasons why it is difficult to manage the risk from future eruptions of Mount Nyiragongo.

[9 marks]

(Turn over)

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

(Turn over)

[illegible]

(Turn over)

Additional space for Question 6(c) only:

(Turn over)

6 (d) Use FIGURE 6b AND FIGURE 6c to examine different HUMAN factors affecting vulnerability to volcanic eruptions in Goma city. [10 marks]

(Turn over)

(Turn over)

[illegible]

(Turn over)

Additional space for Question 6(d) only:

(Turn over)

**7 (a) Examine the effectiveness of prediction
as a response to volcanic hazards.**

[8 marks]

(Turn over)

[illegible]

(Turn over)

[illegible]

(Turn over)

Additional space for Question 7(a) only:

(Turn over)

**7 (b) Outline the tectonic processes
operating at diverging plate margins.
[10 marks]**

(Turn over)

[illegible]

(Turn over)

Additional space for Question 7(b) only:

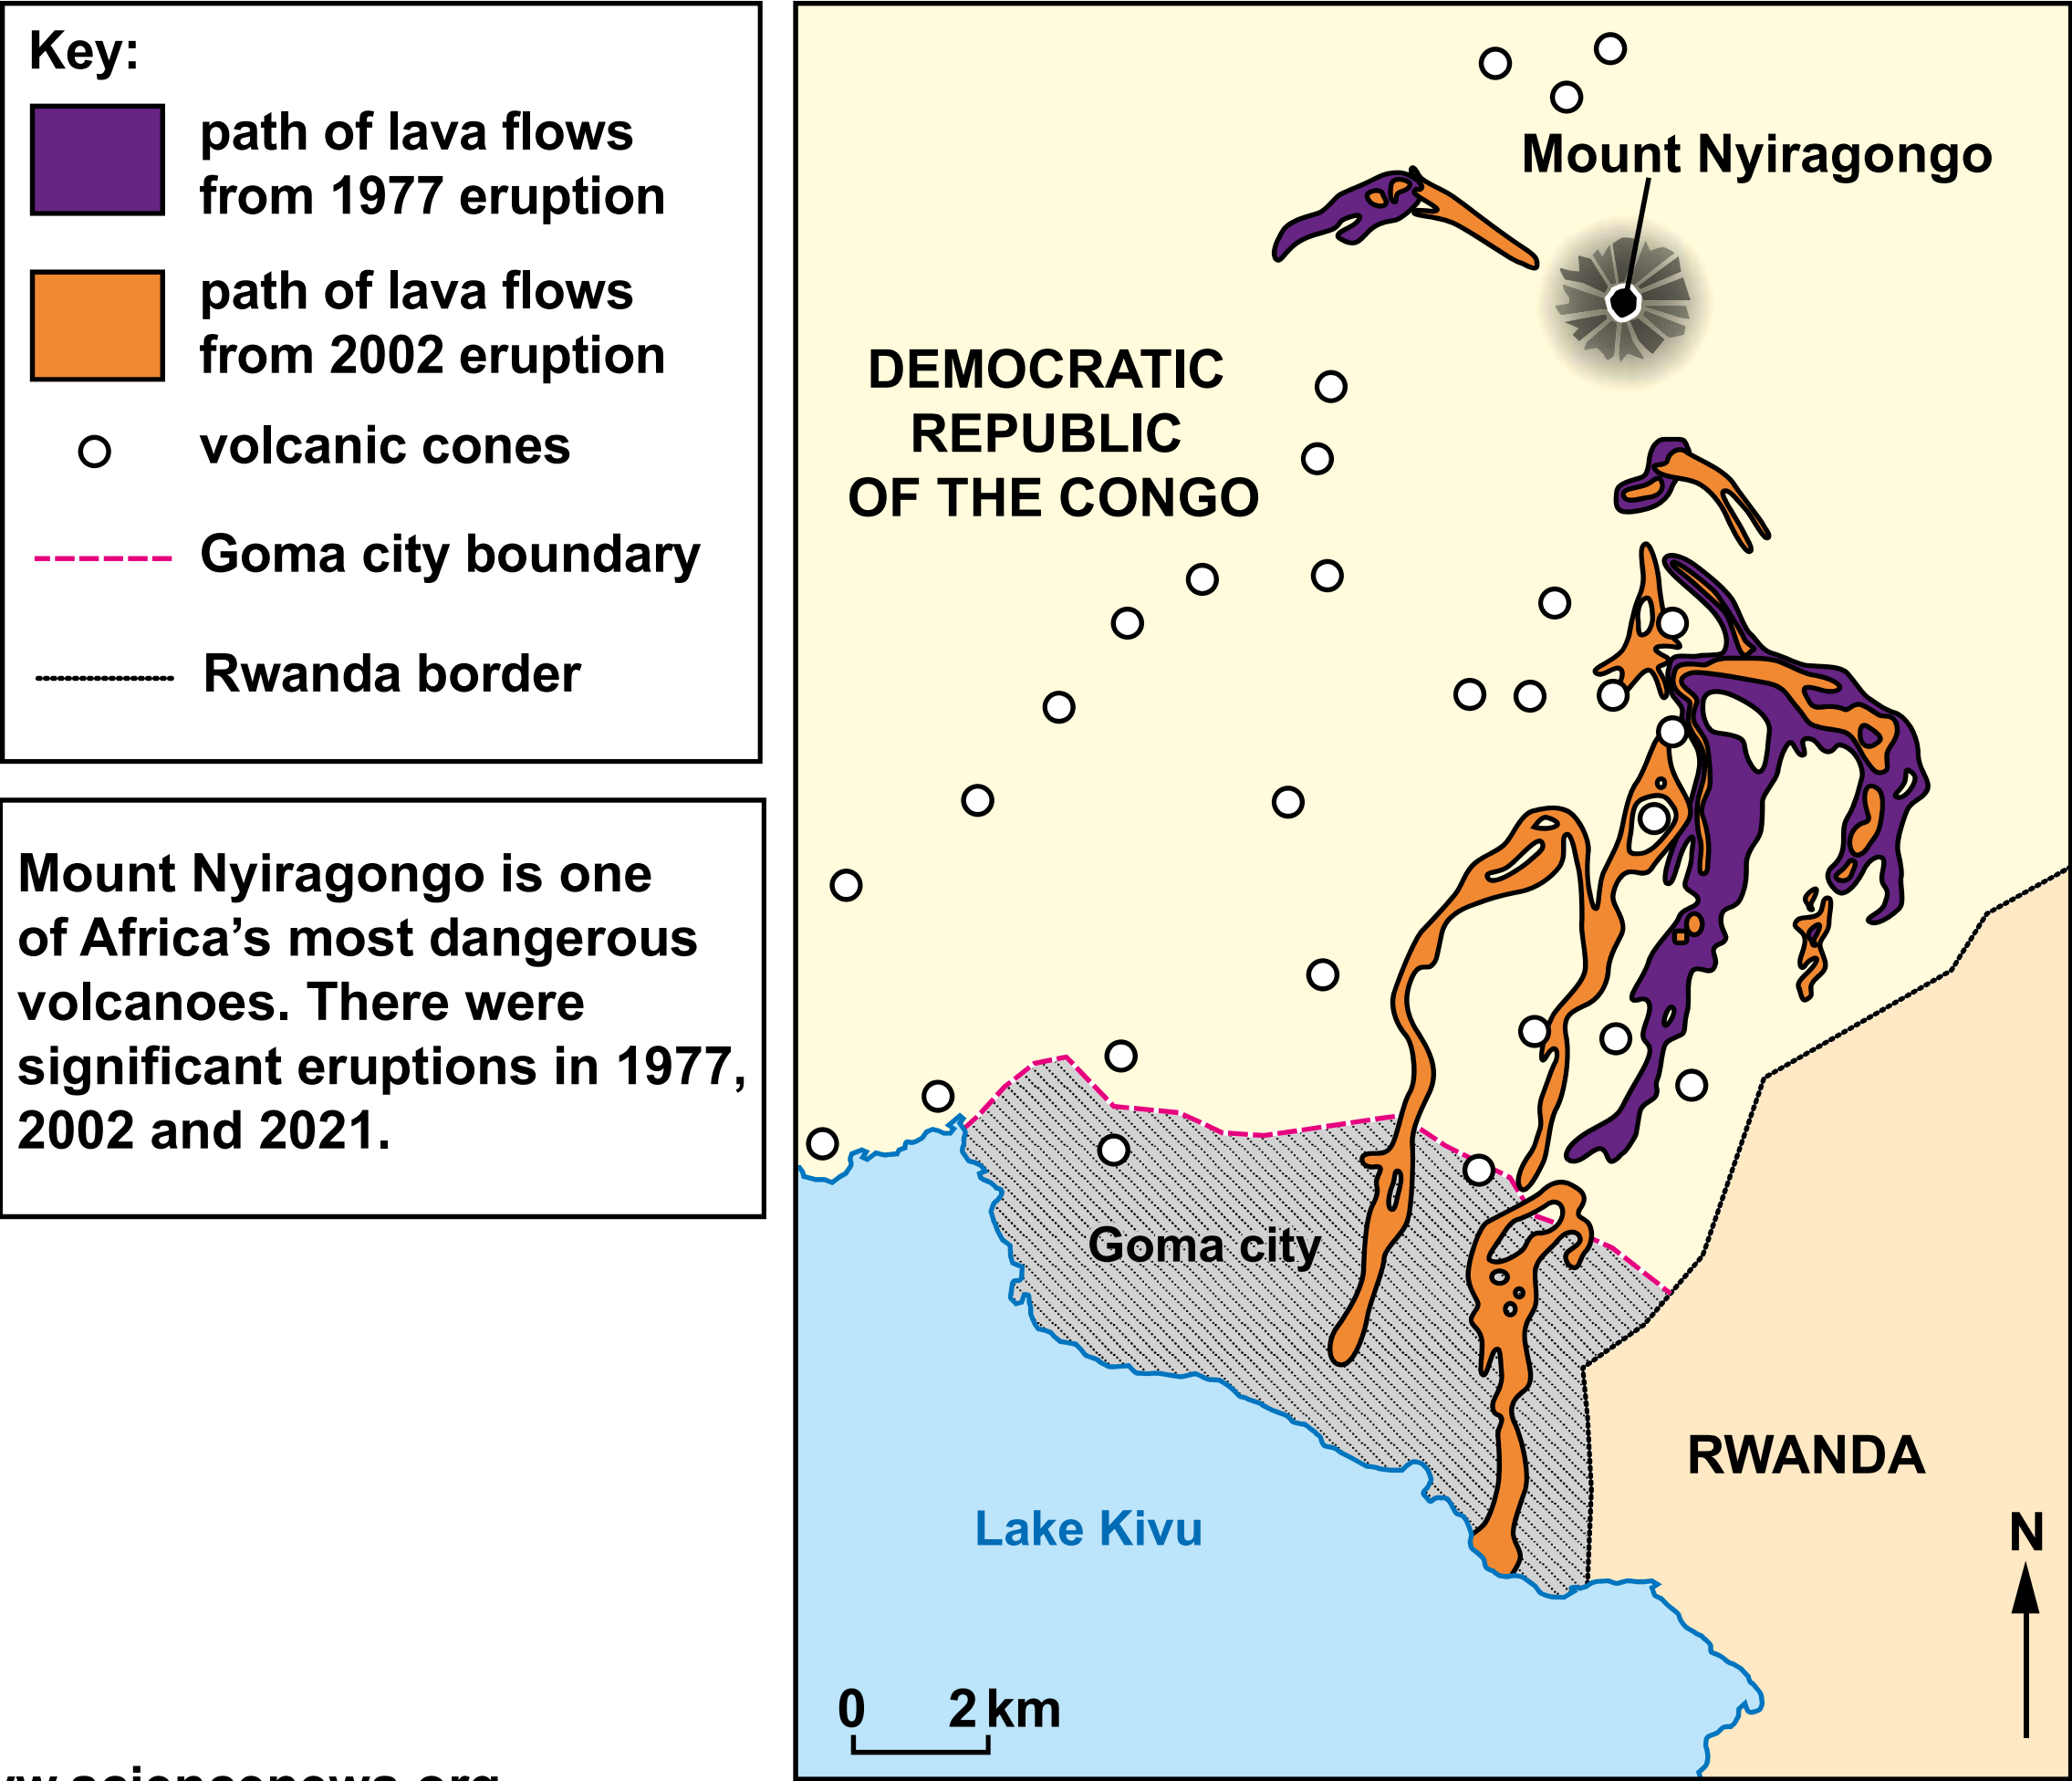

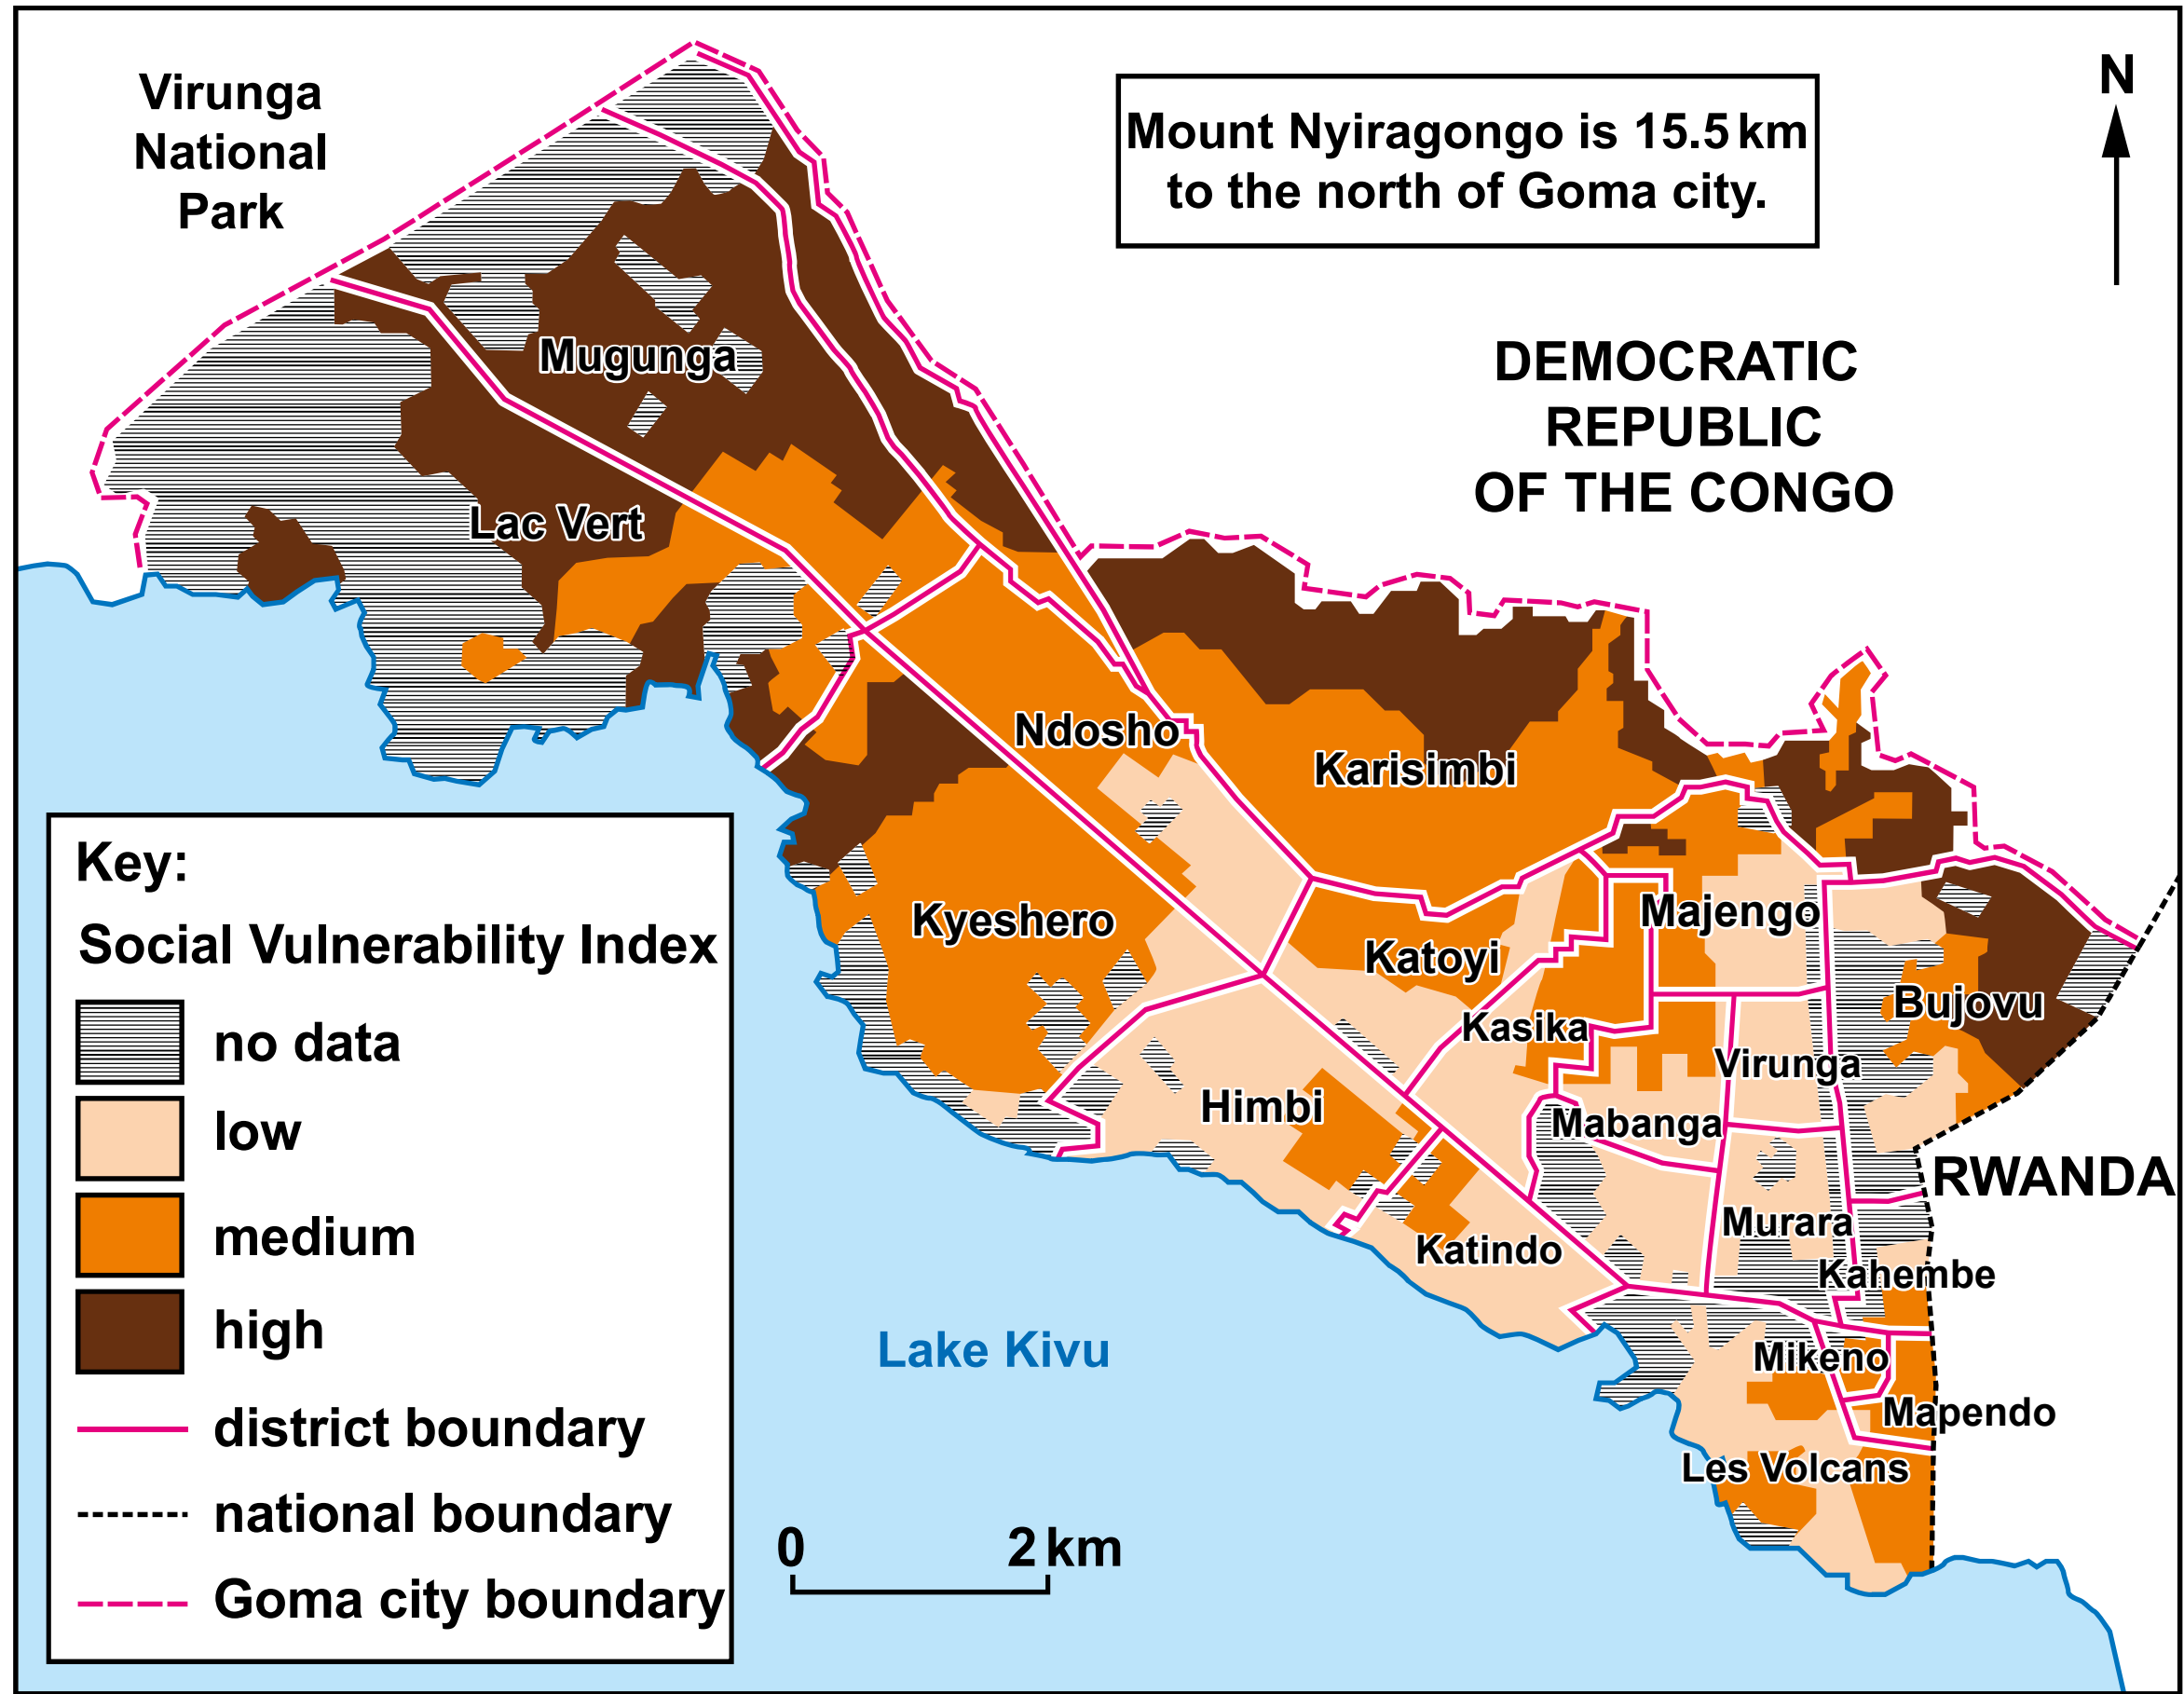

FIGURE 6b: SOCIAL VULNERABILITY TO VOLCANIC ERUPTIONS IN GOMA CITY, DEMOCRATIC REPUBLIC OF THE CONGO

The SOCIAL VULNERABILITY INDEX is based on household income, levels of education and housing quality.

Source: Science direct

GDP per capita per year in DR Congo is \$511.60. In Wales, GDP per capita per year is \$31, 991.

FIGURE 6c: ISSUES AFFECTING HAZARD MANAGEMENT IN DEMOCRATIC REPUBLIC OF THE CONGO

Mount Nyiragongo has a permanent 200-metre-wide lava lake. In 2002, runny lava drained away in a few hours, flowing at 60 kmph. It was 2 metres deep in parts of Goma city. Toxic gases, such as carbon dioxide, were released from fissures and from the crater.

The eruption of 2021 was not predicted and the lava stopped less than 300 metres away from Goma city.

Since 2000, the at-risk population living in the shadow of the volcano has more than doubled to 1.5 million. Refugees from Rwanda added to the population from the mid-1990s.

Civil unrest in the area makes monitoring the volcano dangerous. In 2020, 13 park rangers were killed in an ambush in the nearby Virunga (Albert) National Park. Monitoring equipment has been vandalised or stolen.
