(Turn over)

ADDITIONAL MATERIALS

An additional Formulae Booklet.

A ruler, a protractor and a pair of compasses may be required.

ITEMS INCLUDED WITH QUESTION PAPER

A separate Formula List.

A separate Diagram Booklet.

Model for Question 17.

Cut out shapes for Question 2 (b).

The Diagram Booklet MUST be handed in to the invigilators and sent for marking.

INSTRUCTIONS TO CANDIDATES

Use black ink, black ball – point pen, black felt tip or your usual method.

Write your name, centre number and candidate number in the spaces on the front cover.

Answer ALL questions.

Write your answers in the spaces provided.

If you run out of space, use the additional page(s) at the back of the booklet, taking care to number the question(s) correctly.

Take π to be 3.142 or use the π button on your calculator.

INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.

Unless stated, diagrams are not drawn to scale.

Scale drawing solutions will not be acceptable where you are asked to calculate.

The number of marks is given in brackets at the end of each question or part – question.

You are reminded of the need for good English and orderly, clear presentation in your answers.

1. Enzo and Jane are taking a group of children to the beach for a day trip.

They go to a shop to buy some items for the trip.

The table below shows the prices for some items in the shop.

Bucket	£2.35
Beach ball	£3.20
Set of spades	£4.10
Toy duck	95p

- (a) Complete Enzo's bill provided for Question 1 (a) in the separate Diagram Booklet.

[4 marks]

continued on the next page . . .

(Turn over)

Question 1 continued

- 1. (b) Enzo is given a 10% discount.
How much discount will he get?**

[1 mark]

continued on the next page . . .

(Turn over)

Question 1 continued

- 1. (c) Jane has £15 to spend.**

The shop has a special offer on beach balls:

‘Buy two get one free’

What is the maximum number of beach balls Jane can buy?

[2 marks]

(Turn over)

2. (a) Write the number **340 205** in words.

[1 mark]

- (b) Look at the diagram for Question 2 (b) in the separate Diagram Booklet.

Shade $\frac{1}{3}$ of the shape shown.

Cut out triangles are available for this question.

[1 mark]

continued on the next page . . .

(Turn over)

Question 2 continued

2. (c) What is the value of the 2 in the number 5.2614?

Circle your answer.

$\frac{2}{1}$	$\frac{2}{100}$	$\frac{2}{10}$	2000	200
---------------	-----------------	----------------	------	-----

[1 mark]

- (d) Write these five numbers in order of size.
Start with the smallest.

6 -3 -5 3.6 3.45

Smallest

Largest

[1 mark]

continued on the next page . . .

(Turn over)

Question 2 continued

2. (e) Here are four cards with numbers on them.

- (i) Write down the largest four – digit number that can be made by rearranging the cards.

--	--	--	--

[1 mark]

continued on the next page . . .

(Turn over)

Question 2 (e) continued

2. (e) Here are four cards with numbers on them.

(ii) Write down the smallest EVEN
four – digit number that can be made
by rearranging the cards.

--	--	--	--

[1 mark]

(Turn over)

- 3. Look at the diagram for Question 3 in the separate Diagram Booklet. The diagram shows two scales, scale 1 and scale 2.**

The scales are used to measure the mass of some fruit in grams.

- (a) What is the total mass of the fruit on each of the scales?**

Scale 1 = _____ grams

Scale 2 = _____ grams

[1 mark]

continued on the next page . . .

Question 3 continued

3. (b) Calculate the mass of each pear and the mass of each banana.

Assume that:

- each pear has the same mass
- each banana has the same mass.

Pear _____ **grams**

Banana _____ **grams**

[3 marks]

(Turn over)

4. (a) (i) One hundred tickets are sold in a raffle.

A ticket is to be selected at random and the person with that ticket wins the prize.

Sandra buys one of the tickets.

Circle the expression below that describes the chance that Sandra wins the prize in the raffle.

IMPOSSIBLE
UNLIKELY
AN EVEN CHANCE
LIKELY
CERTAIN

[1 mark]

continued on the next page . . .

(Turn over)

Question 4 (a) continued

4. (a) (ii) Henry has six pairs of shoes in his cupboard.
He picks one shoe out at random.

Circle the expression below that describes the chance that Henry picks out a shoe for his left foot.

IMPOSSIBLE
UNLIKELY
AN EVEN CHANCE
LIKELY
CERTAIN

[1 mark]

continued on the next page . . .

(Turn over)

Question 4 continued

4. (b) Zac has a bag containing 12 marbles.

1 marble is green, 3 are red and the rest are blue.

Zac chooses one marble at random from the bag.

On the probability scale provided for Question 4 (b) in the separate Diagram Booklet, label the points A, B and C where:

- A is the probability that Zac chooses a red marble**
- B is the probability that Zac chooses a yellow marble**
- C is the probability that Zac chooses a marble that is not green.**

[3 marks]

5. Look at the diagram for Question 5 in the separate Diagram Booklet. The diagram shows nine shapes, A, B, C, D, E, F, G, H and I.

Complete the following sentences.

Shapes _____ and _____ have only two lines of symmetry.

Shape _____ has rotational symmetry of order 4

Shapes _____ and _____ are congruent.

Shapes _____ and _____ are similar but not congruent.

[4 marks]

(Turn over)

- 6. Look at the table for Question 6 in the separate Diagram Booklet.**

The table shows part of a train timetable between Portsmouth Harbour and London Waterloo.

- (a) Elise catches the 08:45 train from Portsmouth Harbour to London Waterloo.**
- How long should her train journey take?**

[2 marks]

continued on the next page . . .

(Turn over)

Question 6 continued

- 6. (b) Paul lives in Petersfield and works in Guildford.**

He starts work at 10 a.m.

It takes him 15 minutes to walk from the train station to work.

Paul needs to arrive at work on time.

What is the time of the latest train from Petersfield he can take?

[2 marks]

(Turn over)

- 7. Georgia is going on holiday to France.
She takes one large suitcase and one piece
of hand luggage.**

**Look at the diagram for Question 7
in the separate Diagram Booklet.
The diagram is a graph.**

**The graph can be used to convert between
kilograms and pounds.**

- (a) (i) Georgia's suitcase has a mass
of 25 kg.**

**What is the mass of the suitcase
in pounds?**

[1 mark]

continued on the next page . . .

(Turn over)

Question 7 (a) continued

- 7. (a) (ii) Her hand luggage has a mass of 10 pounds.**

What is the mass of her hand luggage in kilograms?

[1 mark]

continued on the next page . . .

Question 7 continued

- 7. (b) Look at the formula for Question 7 (b) in the separate Diagram Booklet.**

A car hire company in France uses the formula shown to calculate costs in euros (€).

- (i) Georgia decides to hire a car for 8 days.**

Insurance will cost her €95

Calculate the cost of Georgia's car hire.

[2 marks]

(Turn over)

Question 7 (b) continued

7. (b) (ii) Meena is also hiring a car from the same company.

She has €270 to spend on car hire.

Insurance will cost her €126

She wants to hire the car for as many days as possible.

For how many whole days can Meena afford to hire the car?

[3 marks]

(Turn over)

8. Malik is planning a birthday party for 25 children.

He can choose either a swimming party or an adventure centre party.

Look at the information provided for Question 8 in the separate Diagram Booklet. The information shows the costs for each party.

Malik works out the total cost for each party. He chooses the cheaper of the parties.

Which party does Malik choose?

Swimming Party

☐

Adventure Centre Party

☐

You must show all your working.

Swimming Party

Adventure Centre Party

[7 marks]

(Turn over)

9. Rochelle is training for a marathon.
For each of the last five weeks she has recorded how many miles she has run.

- Rochelle runs a whole number of miles each week.
- Her median is **23** miles.
- Her mode is **29** miles.
- Her range is **8** miles.

How many miles in total has Rochelle run in the last five weeks?

You may use the boxes below to help you.

--	--	--	--	--

Total number of miles Rochelle has run

--

[5 marks]

10. Look at the diagram for Question 10 in the separate Diagram Booklet.

The diagram shows two pie charts.

Two different companies use pie charts to show the proportion of male and female employees.

(a) Jamie says,

“Company A has more female employees than Company B.”

Give a reason why he may be incorrect.

[1 mark]

continued on the next page . . .

(Turn over)

Question 10 continued

- 10. (b) Calculate the difference between the PERCENTAGE of male employees in Company A and the PERCENTAGE of male employees in Company B.**

[3 marks]

(Turn over)

11. A shop sells the same breakfast cereal in two different – sized boxes.

A 500 g box of cereal costs £2.21
A 900 g box of cereal costs £3.78

Which box is the better value for money?

500 g

☐

900 g

☐

You must show all your working.

(Turn over)

[2 marks]

12. (a) Simplify $10c \div 2$

[1 mark]

(b) Solve $4x - 5 = 2$

[2 marks]

continued on the next page . . .

(Turn over)

Question 12 continued**12. (c) Expand $7(h - 6)$**

[1 mark]**(d) Factorise $6y + 4$**

[1 mark]**continued on the next page . . .****(Turn over)**

Question 12 continued

12. (e) The diagram below is a square.
The diagram is NOT drawn to scale.

- (i) Find an expression for the perimeter of the square. Simplify your answer.

[2 marks]

- (ii) Find an expression for the area of the square. Simplify your answer.

[2 marks]

(Turn over)

- 13. Look at the diagram for Question 13 in the separate Diagram Booklet.**
The diagram shows two fair spinners, spinner 1 and spinner 2.

Hubert plays a game.

He spins the two fair spinners shown.

Hubert calculates a score.

He SQUARES the number on spinner 1 and MULTIPLIES it by the number on spinner 2.

- (a) Look at the table for Question 13 (a) in the separate Diagram Booklet.**

Complete the table to show all the possible scores.

[2 marks]

continued on the next page . . .

(Turn over)

Question 13 continued

**13. (b) To win the game Hubert must score
MORE THAN 9**

He plays the game 108 times.

**How many times would you expect him
to win?**

[3 marks]

(Turn over)

14. Lynda cycles **31.5 km** from home to work each day.

(a) One day, her journey to work takes her **1 hour and 45 minutes**.

Calculate her average speed in km/h.

[2 marks]

continued on the next page . . .

(Turn over)

Question 14 continued

- 14. (b) Lynda cycles home following the same route.**

She leaves work at 4 p.m.

Her average speed on this journey is 15 km/h.

At what time does Lynda arrive home?

You must show all your working.

[4 marks]

- 15. Look at the diagram for Question 15 in the separate Diagram Booklet.**

The diagram is NOT drawn to scale.

In the diagram, the angles

$3x^\circ$, 152° , 126° and $2y^\circ$ are shown.

Find the value of X and the value of y .

[illegible]

$x =$ _____

$y =$ _____

[3 marks]

16. Calculate the value of $\frac{\sqrt{1456}}{1.3^3 - 0.7}$

Give your answer correct to 1 decimal place.

[2 marks]

17. Ask for the model for Question 17.

The model is NOT made to scale.

The model represents a tank.

Tobias has a tank in the shape of a cuboid.

**It has length 40 cm, width 25 cm and
depth 32 cm.**

**He uses a jug with a capacity of 2 litres to
fill the tank.**

**Tobias fills the jug to the top with water
and pours it into the tank.**

He repeats the process until the tank is full.

How many times does Tobias fill the jug?

Tobias fills the jug _____ times.

[5 marks]

18. Nathan and Lucy make and sell wooden items for gardens.

(a) Nathan makes and sells benches, tables and tool sheds.

Last year, the profit he made from selling these items was in the following ratio.

benches : tables : tool sheds

2 : 3 : 7

(i) What fraction of his profit did Nathan make from selling benches and tables?

[1 mark]

continued on the next page . . .

(Turn over)

Question 18 (a) continued

18. (a) (ii) His total profit was £18 072

**How much profit did Nathan make
from the sale of tool sheds?**

[2 marks]

continued on the next page . . .

(Turn over)

Question 18 continued

18. (b) Lucy makes and sells planters.

Each planter costs Lucy £32 to make.

Each one that she sells makes a

PROFIT of £80

**What is Lucy's profit from the sale of
one planter as a percentage of the cost
to make the planter?**

[2 marks]

(Turn over)

19. The table below gives a summary of the masses, m grams, of 30 buzzards.

Mass, m (grams)	Frequency
$600 \leq m < 700$	8
$700 \leq m < 800$	7
$800 \leq m < 900$	4
$900 \leq m < 1000$	11

- (a) Moeen uses the midpoint of each group to calculate an estimate of the mean mass of these buzzards. He does this correctly.

Calculate Moeen's answer.

[3 marks]

continued on the next page . . .

(Turn over)

Question 19 continued

- 19. (b) Deeta decides to estimate the mean mass of these buzzards.**

She uses the values 600, 700, 800 and 900 rather than the midpoints.

Explain why her method is unlikely to give a good estimate of the mean mass.

[1 mark]

(Turn over)

20. Debbie collects data about a group of 20 people.

Her data is:

- **the total number of years for which they have owned a pet**
- **the number of visits they have each made to their doctor in the last year.**

Look at the diagram for Question 20 in the separate Diagram Booklet.

The diagram is a scatter graph.

The scatter graph shows her results and her attempt to draw a line of best fit for the data.

continued on the next page . . .

Question 20 continued

- 20. (a) Make a criticism of Debbie's line of best fit.**

[1 mark]

continued on the next page . . .

(Turn over)

Question 20 continued

20. (b) Debbie says,

**“BECAUSE THERE IS A
NEGATIVE CORRELATION,
owning a pet for longer CAUSES
people to need to visit the doctor
less often.”**

Is Debbie correct?

Yes

☐

No

☐

Explain how you decide.

[1 mark]

(Turn over)

21. Janet invests **£5000** in a savings account for **9** years.

She makes no further payments into or out of her account in this time.

For the first **5** years, her investment earns **2%** compound interest per year.

After this, the interest rate decreases to **1.3%** compound interest per year.

How much is Janet's investment worth at the end of the **9** years?

[4 marks]

22. (a) Circle the correct conversion of
 7 m^3 to cm^3

0.00007	0.07	700	70000	7000000
---------	------	-----	-------	---------

[1 mark]

continued on the next page . . .

(Turn over)

Question 22 continued

- 22. (b) Look at the diagram for Question 22 (b) in the separate Diagram Booklet.**

The diagram is NOT drawn to scale.

The diagram shows a shape made from a trapezium and a circle.

The parallel sides of the trapezium are tangents to the circle.

The diameter of the circle is 30 cm.

The ratio of the white area to the SHADED area is as follows.

White area : shaded area

1 : k

Find the value of k .

Show all your working and give your answer correct to 1 significant figure.

[6 marks]

23. (a) Solve $5y + 4 = 2y + 6$

[2 marks]

continued on the next page . . .

(Turn over)

Question 23 continued**23. (b) Solve $4x - 3 > 17$**

[2 marks]**continued on the next page . . .****(Turn over)**

Question 23 continued

- 23. (c) Solve the following simultaneous equations. Use an algebraic (not graphical) method.**

$$5x - 2y = 16$$

$$x - y = 5$$

You must show all your working.

[illegible]

(Turn over)

[3 marks]

(Turn over)

24. Look at the diagram for Question 24 in the separate Diagram Booklet.

The diagram is NOT drawn to scale.

The diagram shows a rhombus, ***ABCD***.

AC and ***BD*** intersect at ***E***.

The length of ***AC*** is 12 cm.

Angle ***BCE*** is 35°

Find the perimeter of ***ABCD***.

Perimeter of $ABCD$ = _____ cm
[6 marks]

**FORMULA LIST
FOUNDATION TIER
AND HIGHER TIER
GCSE**

You must not write on these formulae pages.

Anything you write on these formulae pages will gain NO credit.

AREA AND VOLUME FORMULAE

Where r is the radius of the sphere or cone,
 l is the slant height of a cone and
 h is the perpendicular height of a cone:

Curved surface area of a cone = $\pi r l$

Surface area of a sphere = $4\pi r^2$

Volume of a sphere = $\frac{4}{3}\pi r^3$

Volume of a cone = $\frac{1}{3}\pi r^2 h$

KINEMATICS FORMULAE

Where a is constant acceleration,
 u is initial velocity, v is final velocity,
 s is displacement from the position
when $t = 0$ and t is time taken:

$$v = u + at$$

$$s = ut + \frac{1}{2}at^2$$

$$v^2 = u^2 + 2as$$

C300U20-1A

THURSDAY, 3 NOVEMBER 2022 – MORNING

MATHEMATICS

FOUNDATION TIER

Additional Formulae

PERIMETER, AREA AND VOLUME

Where a and b are the lengths of the parallel sides and h is their perpendicular separation:

$$\text{Area of a trapezium} = \frac{1}{2}(a + b)h$$

Volume of a prism =
area of cross section $\times$ length

Where r is the radius and
 d is the diameter:

$$\text{Circumference of a circle} = 2\pi r = \pi d$$

$$\text{Area of a circle} = \pi r^2$$

PYTHAGORAS' THEOREM AND TRIGONOMETRY

In any right – angled triangle where a , b and c are the length of the sides and c is the hypotenuse:

$$a^2 + b^2 = c^2$$

In any right – angled triangle ABC where a , b and c are the length of the sides and c is the hypotenuse:

$$\sin A = \frac{a}{c} \quad \cos A = \frac{b}{c} \quad \tan A = \frac{a}{b}$$

COMPOUND INTEREST

Where P is the principal amount,
 r is the interest rate over a given period
and n is number of times that the
interest is compounded:

$$\text{Total accrued} = P \left(1 + \frac{r}{100} \right)^n$$

PROBABILITY

Where $P(A)$ is the probability of
outcome A and $P(B)$ is the probability
of outcome B :

$$P(A \text{ or } B) = P(A) + P(B) - P(A \text{ and } B)$$
