PSYCHOLOGY – A level component 2

Psychology: Investigating Behaviour

2 hours 15 minutes plus your additional time allowance

Surname _____

First name(s) _____

Centre Number _____

Candidate Number 2 _____

For Examiner's use only		
Question	Maximum Mark	Mark Awarded
1.	8	
2.	2	
3.	6	
4.	4	
5.	2	
6.	6	
7.	12	
8.	15	
9.	15	
10.	19	
11.	11	
Total	100	

ADDITIONAL MATERIALS

In addition to this paper you may require a calculator and a ruler.

INSTRUCTIONS TO CANDIDATES

Use black ink, black ball-point pen or your usual method.

You may use a pencil for graphs and diagrams only.

Write your name, centre number and candidate number in the spaces provided on the front cover.

Answer ALL questions.

Write your answers in the spaces provided in this booklet. Additional space is provided for some questions within the booklet (if required). If further space is required for any question, you should use the additional page(s) at the back of the booklet, taking care to number the question(s)

(Turn over)

INFORMATION FOR CANDIDATES

The number of marks is given in brackets at the end of each question or part-question.

You are reminded of the necessity for good English and orderly presentation in your answers.

Assessment will take into account the quality of written communication used in your answers.

SECTION A – PRINCIPLES OF RESEARCH

Answer ALL questions.

1. Define the following terms:

(a) Researcher bias. [2 marks]

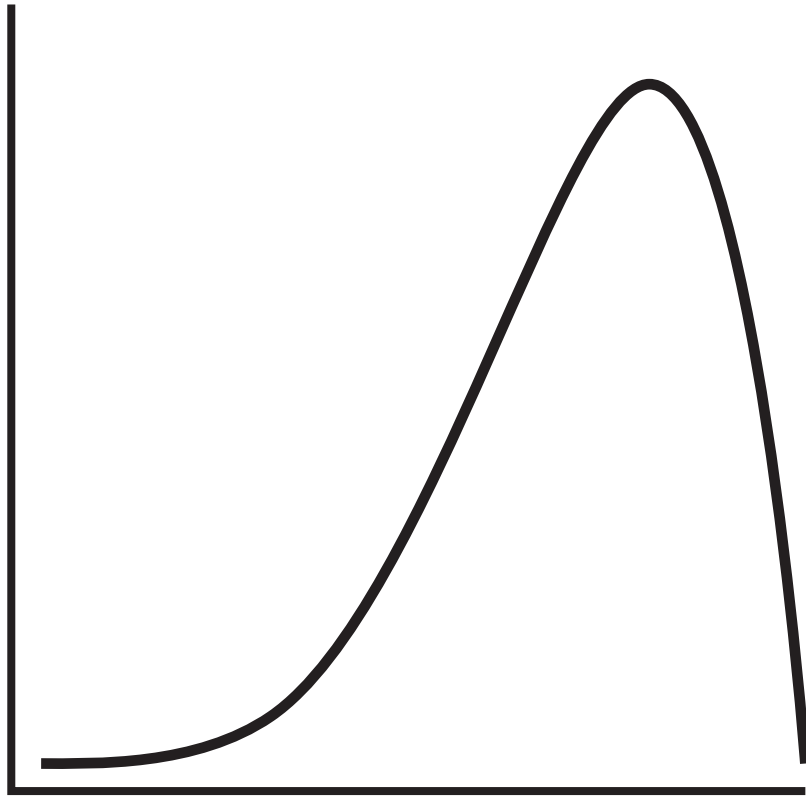

(Turn over)

1 (b) Demand characteristics. [2 marks]

1 (c) Predictive validity. [2 marks]

1 (d) Secondary sources. [2 marks]

2 (a) Identify the type of skewed distribution in this diagram. [1 mark]

2 (b) Identify the type of skewed distribution in this diagram. [1 mark]

- 3. Explain how psychologists use ethics committees and ethical guidelines to manage the risk posed by ethical issues. [3 + 3 marks]**

[illegible]

Additional space for Question 3 only:

[illegible]

4 (b) Explain why a psychological researcher might use range for measuring dispersion in a set of data.

[2 marks]

(Turn over)

5. Explain ONE advantage of using quantitative data in psychological research. [2 marks]

6. Evaluate the use of brain scans in psychological research. [6 marks]

[illegible]

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

7 (a) Discuss the limitations of the methodology used by Kohlberg (1968) in his research ‘The child as a moral philosopher’. [6 marks]

[illegible]

(Turn over)

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

7 (b) Discuss ethical issues with Kohlberg's (1968) research 'The child as a moral philosopher'. [6 marks]

[illegible]

(Turn over)

[illegible]

(Turn over)

SECTION B – PERSONAL INVESTIGATIONS

You should answer **ALL** the questions in this section with reference to the investigations carried out in your study of psychology.

INVESTIGATION ONE: An experiment on a context dependent memory task.

8 (a) (i)

Explain how you operationalised the independent variable in your experiment.

[2 marks]

(Turn over)

8 (a) (ii)

Explain how you operationalised the dependent variable in your experiment. [2 marks]

(Turn over)

8 (b) Identify ONE extraneous variable that you considered and explain how you managed this variable in your experiment. [3 marks]

[illegible]

(Turn over)

8 (c) Explain ONE ethical issue that you considered and explain how you managed this ethical issue in your experiment. [4 marks]

(Turn over)

[4 marks]

[illegible]

(Turn over)

INVESTIGATION TWO: A non-participant observation of mobile phone use.

9 (a) (i)

State an operationalised hypothesis for your non-participant observation. [2 marks]

(Turn over)

9 (a) (ii)

Identify whether your hypothesis in 9(a)(i) is directional or non-directional. [1 mark]

9 (b) Identify and briefly explain the observational sampling technique used in your non-participant observation. [3 marks]

(Turn over)

9 (c) Evaluate the sampling technique you used to select participants for your non-participant observation. [4 marks]

This image shows a single page of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page, typical of notebook paper. There are no margins, text, or other markings visible.

(Turn over)

Additional space for Question 9(c) only:

(Turn over)

9 (d) A psychologist wants to replicate your non-participant observation. Apart from sampling, discuss TWO improvements that they could make. [5 marks]

Additional space for Question 9(d) only:

FIGURE 1: The number of bags of popcorn eaten during the action movie and the romantic movie

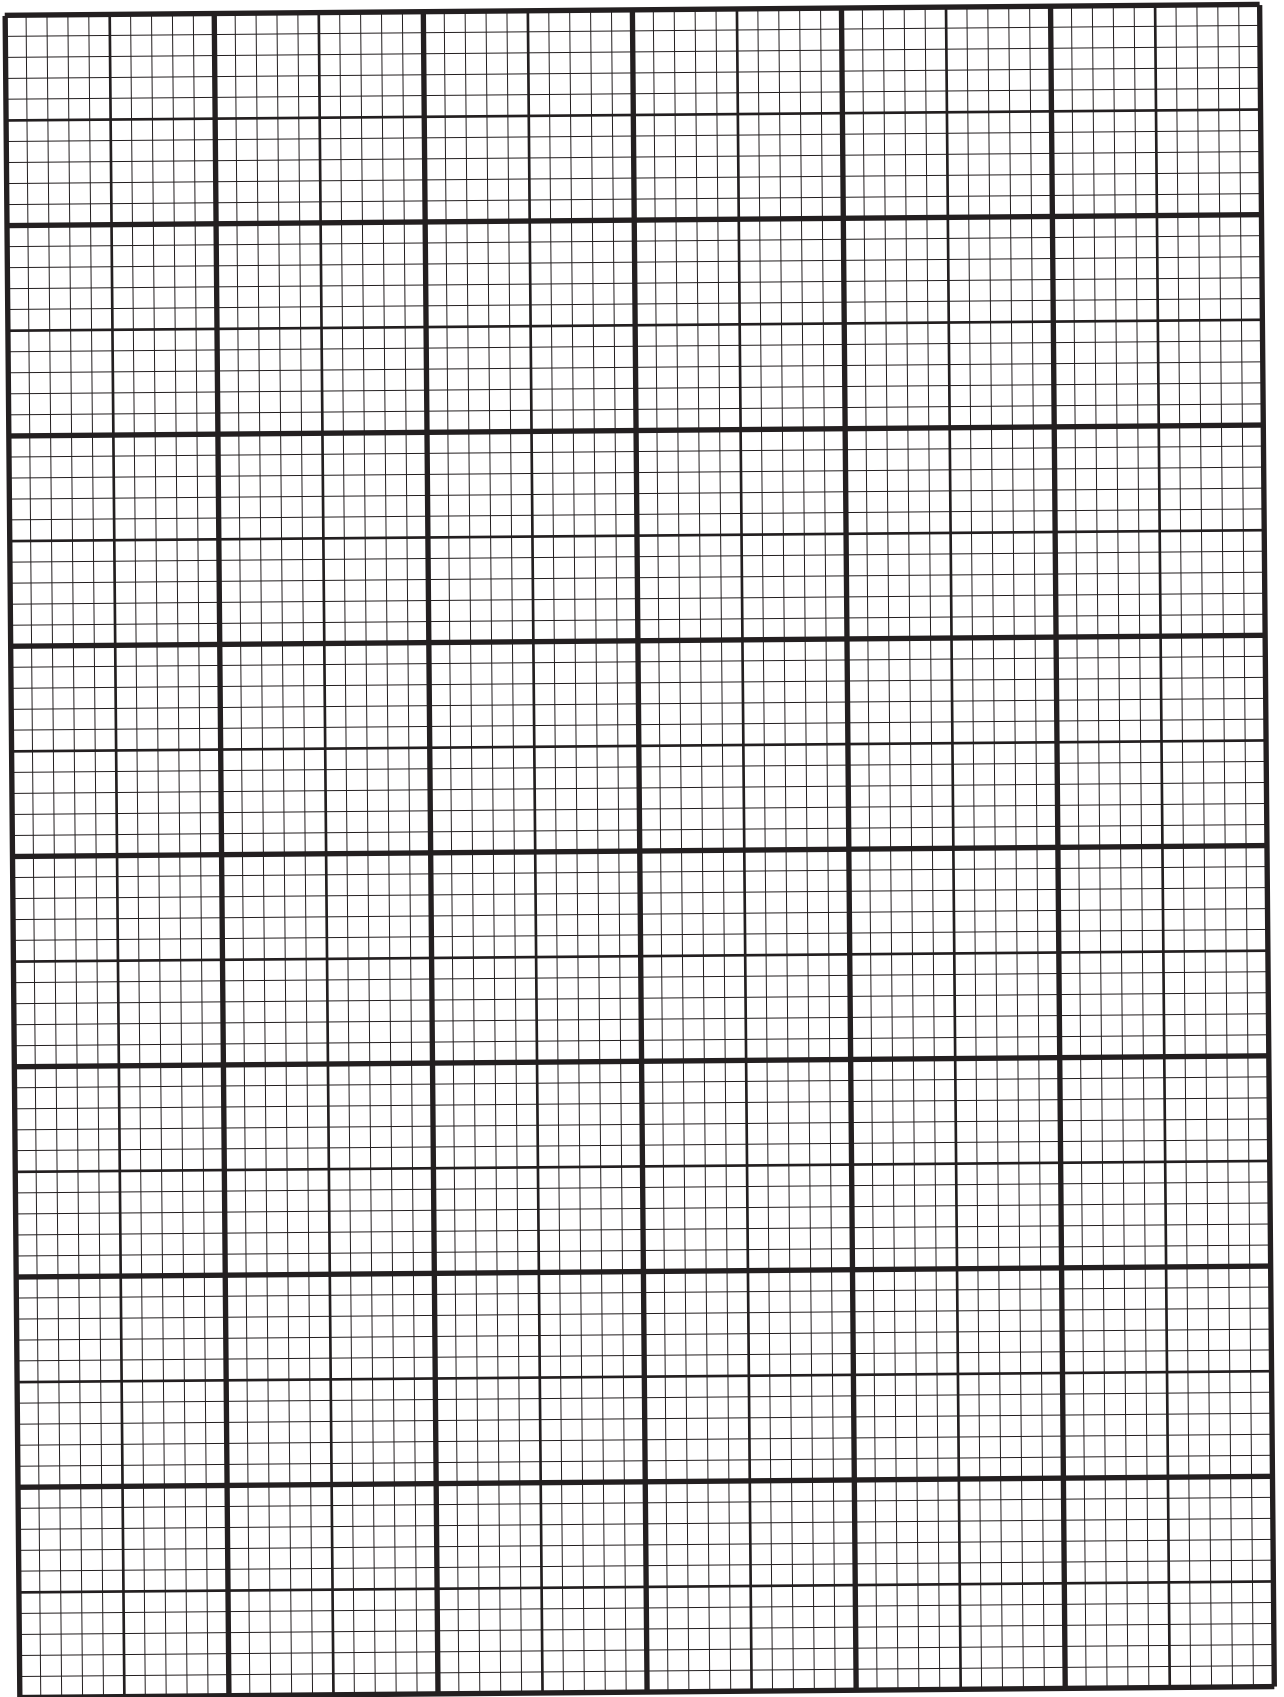

Participant number	Number of bags of popcorn eaten by Group A – watching an action movie	Participant number	Number of bags of popcorn eaten by Group B – watching a romantic movie
1	3	16	4
2	2	17	2
3	3	18	4
4	1	19	0
5	4	20	2
6	3	21	1
7	6	22	2
8	4	23	5
9	3	24	1
10	2	25	2
11	4	26	2
12	3	27	2
13	3	28	2
14	5	29	0
15	4	30	2

**SECTION C – APPLICATION OF RESEARCH METHODS
TO A NOVEL SCENARIO**

Answer ALL questions.

- 10. A self-selecting sample of 30 college students were randomly allocated into one of two groups – Group A watched an action movie and Group B watched a romantic movie. Students could take as many free bags of popcorn as they wanted during the movie.**

The researcher predicted that more popcorn would be eaten during the action movie than during the romantic movie. At the end of the film, the amount of popcorn that each participant had eaten was recorded (FIGURE 1) opposite.

10 (a)

Using an appropriate graphical representation, display the data from FIGURE 1 on the graph paper opposite. [4 marks]

10 (b) (i)

Suggest an appropriate measure of central tendency to describe the number of bags of popcorn eaten and fully justify why this is appropriate in this research. [3 marks]

(Turn over)

10 (b) (ii)

Calculate the measure of central tendency identified in 10(b)(i) for Group A. Show your workings. [2 marks]

[illegible]

(Turn over)

FIGURE 2: Critical values for the Mann Whitney U test, where $p \leq 0.05$

		N ₁										
		10	11	12	13	14	15	16	17	18	19	20
N ₂	10	27	31	34	37	41	44	48	51	55	58	62
	11	31	34	38	42	46	50	54	57	61	65	69
	12	34	38	42	47	51	55	60	64	68	72	77
	13	37	42	47	51	56	61	65	70	75	82	84
	14	41	46	51	56	61	66	71	77	82	87	92
	15	44	50	55	61	66	72	77	83	88	94	100
	16	48	54	60	65	71	77	83	89	95	101	107
	17	51	57	64	70	77	83	89	96	102	109	115
	18	55	61	68	75	82	88	95	102	109	116	123
	19	58	65	72	80	87	94	101	109	116	123	130
	20	62	69	77	84	92	100	107	115	123	130	138

The psychologist analysed if the findings were significant by performing a Mann Whitney U test. The calculated value was 57.5

10 (c) (i)

Identify the appropriate critical value for this research from **FIGURE 2** opposite. [1 mark]

(c) (ii)

Explain what is meant by ' $p \leq 0.05$ ' in this research. [2 marks]

(Turn over)

10 (c) (iii)

Explain why the researcher should accept or reject the null hypothesis. [2 marks]

(Turn over)

10 (d) Explain why a psychologist would use an independent groups design rather than a repeated measures design. [5 marks]

11. A librarian is worried that the library where they work may be closed down due to a lack of use. A questionnaire was carried out on the high street of the town using an opportunity sample. People were asked for their reasons why they do or do not use library services.

(a) Explain ONE strength of collecting qualitative data rather than quantitative data in this questionnaire.

[2 marks]

(Turn over)

11 (b) Explain ONE issue of reliability with this research and how the researcher could have dealt with the issue. [4 marks]

[illegible]

(Turn over)

11 (c) Evaluate the use of a semi-structured interview compared to a structured interview in psychological research. [5 marks]

Additional space for Question 11(c) only:

END OF PAPER

(Turn over)

Question number	Additional page, if required. Write the question numbers in the left-hand margin.

(Turn over)

Question number	Additional page, if required. Write the question numbers in the left-hand margin.

(Turn over)

Question number	Additional page, if required. Write the question numbers in the left-hand margin.

(Turn over)

Question number	Additional page, if required. Write the question numbers in the left-hand margin.
